

LIGHT OF ALBION: MONSTERS COMPENDIUM

This document allows you to make the following additions to your Warhammer 8th Edition armies. These additional units are designed to allow you to use your full collection and have some diversity in your army.

How to use this?

You may select any number of units from the list presented under the generic monsters section and/or your specific armies section, unless otherwise stated. This choice comes out of your **RARE** slot unless otherwise specified (Meaning maximum 2 of the same choice). Where stated these models may have a minimum specified base size; you may make them no smaller than this. Just like in the main Campaign weekend document, these models may incur a composition score. Apply it in the same way stated in the main document.

Colossal Beast: Please ignore the 2nd sentence of this special rule (Found on page 16 of Monstrous Arcanum). All other parts of the rule still apply.

Generic Monsters

- Incarnate Elemental of Beasts (May only be taken if your army includes a level 3+ Lore of Beasts Wizard.) (Monstrous Arcanum) (Base 50mm x 50 mm)
